Summary

Recent CSE graduate from Ahsanullah University of Science and Technology (AUST) with foundational skills in full-stack web development. Experienced with HTML, CSS, Tailwind CSS, JavaScript, React, PHP, Java, and MongoDB through academic projects. Currently learning Node.js, Express.js, REST APIs, and backend development.

Technical Skills

Frontend: HTML5, CSS & Tailwind CSS, JavaScript, React

Backend: [Node.js](#), [Express.js](#), RESTful APIs

Databases: MongoDB, FireBase, MS SQL, MySQL

Tools & Workflow: Git & GitHub, npm, VS Code, browser devtools, Linux (Ubuntu via VMware)

Languages: Python, Java, C++, PHP

Cloud: AWS

Projects

WorkHub | Project Management System | *ASP.NET MVC, MongoDB*

- Developed a project management system with roles for Admin, Manager, and Developer. Implemented features like task management, file attachments, notifications, Kanban boards, and Gantt charts. Designed role-based functionality for project collaboration.

Blog Website | A Simple Blog Website | *PHP, HTML*

- Created a blog platform supporting post viewing, category filtering, and search functionality. Implemented a basic user sign-up interface.

Social Network Website | A simple Social Networking Website | *PHP, HTML*

- Developed a simple social networking platform with user profiles, posts, messaging, and search functionality. Implemented basic user authentication and profile editing features.

ReadEasy | Android PDF Reader App | *Java, Firebase*

- Built an Android application for browsing, downloading, and reading PDF documents. Implemented Firebase authentication, realtime database, and cloud storage.
